Dear Patient,

Thank you for your inquiry about my practice. I am here to serve you in whatever capacity you wish. Please take the time to read the enclosed information about our clinic. The Integrative Medical Pain Clinic is a modern, full service medical clinic specializing in safe and effective natural therapies for symptoms of aging, disease prevention, and particular for individualized pain management for different conditions.

I have been offering individualized treatment protocols combining the best of both conventional and alternative medicine for over 20 years. During the time I have successfully treated virtually every disease there is. I am emphasizing on treating the cause of the disease, not merely the symptoms.

I employ regenerative medicine methods, like platelet rich fibrin injection, platelet rich, platelet injections, prolozone therapy, prolotherapy to heal muscular skeletal injuries, disc degeneration and degenerative arthritis or autoimmune triggered reactive arthritis. I also employ dietary manipulation, herbs, vitamins, minerals, homeopathy, detoxification, neural therapy (like acupuncture), oxidation therapy, natural hormone replacement, chelation therapy, and lifestyle modification to optimize the body's instability to heal itself. Some of the most common conditions I treated are chronic fatigue, fibromyalgia, heart disease, chronic infections, autoimmune diseases, muscular-skeletal pain, and female sexual disorders. We also use some of the most effective therapies available to treat wrinkles, age spots, acne scars, PMS and menopause hormone therapy.

I am licensed to prescribe medication, however most medical problems can be successfully treated without the need for drugs and their potential side effects. I am certified in Physical Medicine and Rehabilitation. I am committed to providing you with the very best in alternative and conventional medicine, as well as information and support you need to get well in a sensitive and unhurried manner.

If you have any questions at all, don't hesitate to call the clinic and speak to me. If you have access to the internet, you can learn a lot about what we do at my website.

Sincerely,

Linda Li, MD
